PRODUCT ENGINEERING

PUBLISHED MONTHLY

McGRAW-HILL PUBLISHING COMPANY, INC. 330 West 42d Street, New York, N. Y.

INDEX TO VOLUME 13

January to December, 1942

January 1– 60
February 61–120
March 121–180
April 181–246
May 247–306
June 307–366
July 367–426
August 427–486
September 487–546
October 547–614
November 615–678
December 679–746

* ILLUSTRATED

A

AIRCRAFT:

Aircraft welding. R. R. Wiese (Ref. Bk. Sheets) *119
Aircraft are different. G. F. Nordenholt *368
Aircraft engines mounted on rubber.. *511
Choice of plastics materials. Horace C. Hillman *584
Factors that influence design when using different materials..... *530
Hydraulic control and power systems for aircraft, pt. 1, *656; pt. 2..... *731
Hydraulic control speeds milling of aircraft pistons *507
Interlocked steel "planks" make landing field *695
Japanese plane parts copied from American designs *504
Link trainer saves with die-castings.. *576
Plastics in aircraft tooling..... *398
Plastics in fighting aircraft..... *10
Riveted fastenings. Ezra C. Posner.. *446
Surface roughness controlled by aircraft standard. J. W. Borgquist... *658
Analogues and models for solving design problems. E. N. Kemler..... *660
Angles measurement. H. H. Stevens, Jr. *392

Army and Navy approvals of redesigns... *684

AUTOMOBILES:

Lamp for Ford cars redesigned..... *222

Redesigns by General Motors..... *214
Willys-Overland saves rubber in three places *241

B

Balancing machines. F. L. Schwartz.... *32
Beams, deflection of, under simultaneous axial and transverse loads. A. G. Strandhagen *396

BEARINGS:

Sleeve bearing data. Bruno Sachs (Ref. Bk. Sheets)..... *365
Sleeve bearings. Bruno Sachs, pt. 1, *248; pt. 2, *322; pt. 3, *384; pt. 4.. *462
Thin-babbitt, steel-backed bearings.. *260

Bushings—steel bushings in alumnium fittings. H. N. Hill..... *659

C

Calculus, difference, to compute shaft deflections. A. H. Church..... *13
Causes and cures.....31, 81, 147, 273, 333, 395, 451, 519, 597, 637, 713
Ceramics, improved 349
Color for efficiency. Denning & Brainerd. *19

CONSTRUCTION TYPES AND ASSEMBLY METHODS:

Aircraft production brings different problems. G. F. Nordenholt..... *368
Design of forgings for speedier production. O. A. Wheelon, pt. 1, *524; pt. 2 ..... *560
Designs of deep-drawn shapes made by simple dies and welding. E. H. Hautz *728
Detail design for joining by flash welding. L. W. Combs..... *552
Estimating forging costs. O. A. Wheelon *641
Forging design data—areas of forging sections. O. A. Wheelon (Ref. Bk. Sheets) *612
Induction heating. H. B. Osborn, Jr. *261
"Reasons why" of shell design..... *620
Redesigns of simple steels..... *184
Spring steels. H. Carlson, pt. 1, *2; pt. 2, *89; pt. 3..... *139
Vibration control. Leon Wallerstein, Jr. *62
Welded construction. E. W. P. Smith. *338
Welded strap ends for brake and clutch bands. Gustaf Johansson... *262
Welded structures; causes of deformation and their correction. Gustaf Johansson *390

Contacts for cord sets. E. O. Morton.... *454
Copper alloy specification numbers. Wilkins & Bunn (Ref. Bk. Sheets), pt. 1, 423; pt. 2..... 483
Corrosion:
Ihrigizing makes pump shaft corrosion resistant *193
Methods to avoid corrosion..... *192
Way to make small parts corrosion resistant *202
Critical speeds, calculation. C. R. Freberg and E. N. Kemler..... *439
Cupro-nickels. Wilkins & Bunn..... *350

D

DESIGN, CALCULATIONS AND STRESS ANALYSIS:

Acceleration-sensitive governors *150
America's Liberty ships built to deliver cargoes for war..... *488
Angles in space; their measurement on a direction diagram. H. H. Stevens, Jr. *392
Calculation of vibrations in multi-mass systems. C. R. Freberg..... *588
Critical speeds. Freberg & Kemler.. *439
Deflection of beams under simultaneous axial and transverse loads. A. G. Strandhagen *396
Designing molded plastic parts. H. C. Hillman *498
Difference calculus. A. H. Church... *13
Dimensional tolerances and quality control. J. W. White..... *634
Dynamic balancing. F. L. Schwartz.. *32
Electric strain gages for measuring loads on machine parts. Frank Mittelberger *337
Factors that influence design when using different materials..... *530
Gear tooth profiles. C. G. Pfeffer.... *328
Graphical analysis of stresses in three-dimensional loading. Freberg & Kemler..... *714
How to determine WR^2 by running a simple test. L. H. Berkley..... *704
Impact vibrations. L. M. Dekanski, pt. 1, *458; pt. 2..... *515
Measuring angles between planes. H. H. Stevens, Jr..... *443
Model tests and laws for predicting performance. H. O. Fuchs..... *556
Models and analogues for solving design problems. E. N. Kemler..... *660
Procedure blanks and charts simplify spring design. Carl Thumin..... *662
Rectangular shafts. M. F. Spotts.... *319
Riveted fastenings. E. C. Posner..... *446
Sleeve bearing data. Bruno Sachs (Ref. Bk. Sheets)..... *365
Sleeve bearings. Bruno Sachs, pt. 1, *248; pt. 2, *322; pt. 3, *384; pt. 4. *462
Springback in flanging. Chapman, Hazlett & Schroeder..... *382
Steel bushings in aluminum fittings. H. N. Hill..... *659
Surface roughness controlled by aircraft standard. J. W. Borgquist... *658
Testing small springs. J. F. Cavanagh *520
Toggle design. H. A. Illing..... *68
Torsion analysis of open shell structures. E. H. Spaulding, pt. 1..... *718
Universal joints — how to determine loads by vectorial analysis. Hagenbook & Holstein..... *334
Vibration control. Leon Wallerstein, Jr. *62
Wrench clearances required for bolting-up pipe flanges. A. H. Korn... *154

DESIGN DESCRIPTIONS:

Aircraft engines mounted on rubber.. *511
Aircraft seats of plastic..... *374
America's Liberty ships built to deliver cargoes for war..... *488
Army searchlights replace aluminum with steel stampings..... *629
Army's rubber floats..... *624
Bar stool strengthened by welding.... *133
Bearings, thin-babbitt, steel-backed.. *260
Belt roller replaces aluminum with plastic *632
Binoculars with vinyl covering..... *633
Bus redesigned, aluminum eliminated, weight reduced *6
Buses, all-steel *187
Clothes press redesigned..... *438
Clutch hydraulically dampened..... *374
Coal scale has dust-tight housing.... *76
Coolant system welded..... *511
Crusher has rigid cast steel, welded members *692
Cutter with electronic motor control.. *626
Diesel engine has polyvinyl alcohol tubing *374
Diesel pancake engine..... *513
Diesels mounted on plastic blocks.... *318
Dyeing machine maintains uniform cloth tension *259
Electrical roaster and hotplate mounted on cabinet..... *131
Flow alarm magnetically operated... *134
Forging machine has cast steel for rigidity *128
Gas engine has cast Meehanite crankshaft *130
Generator brush holder..... *376
Grinder has lubricator mounted on wheel head *12
Hammer, pulverizer *575
Heating equipment, induction..... *378
Hoist, arm type..... *579
Hydraulic vise operated by foot valve pump *9
Iron, high-frequency *77
Jacketed elbow now welded; weight cut 40 percent..... *694
Lantern, hand, of butyrate plastic.... *315
Lathe has two-speed tailstock..... *432
Lathe replaces aluminum with plastics *437
Light reflectors of silvered glass..... *378
Link trainer saves with die-castings.. *576
Magnifying lens on lathe of plastic... *578
Meter arm of hollow steel..... *232
Milling machine, hydraulic fin..... *507
Mortar grinder driven by standard gear motor *131
Motion picture film winder..... *257
National Acme automatic machine with steel covers..... *258
Nozzles, sand blast, of ceramics..... *318
Odor adsorber for room..... *75
Oil furnace has triple insulation..... *132
Oil well casing..... *438
Ordnance brazed assemblies save material *631

Ordnance forged parts replaced by stampings *630
Outboard motor redesigned to eliminate aluminum *194
Packaging machine control circuit redesigned *242
Paper making machinery *375
Pedestal for buffer welded *133
Pipe, drainage, of wood *436
"Planks", interlocked steel, made landing field *691
Plastic strip held by staples *260
Plastics for gun grips, bayonet handles *131
Plastics in fighting aircraft *10
Plate, large surface cast *11
Potentiometer pyrometer, electronic ..*254
Press, powder-consolidating, has interlocked controls *11
Pulleys, high-speed wood *436
Pump, centrifugal *134
Pump, hand, for aircraft, has pressure molded parts *632
Pump has "squeegee" action *74
Pump, stirrup, of non-strategic materials *316
Register now made of steel and plastics *226
Relay insulator base *77
Relay, mercury plunger *317
Rollers, plastic *256
Rotary inductor for radio transmitters *377
Screw machine driven by variable-speed units *71
Sextant, light weight, improved by optical properties of plastics *688
Siren, Chrysler-Bell victory *573
Soldering tools *73
Switch armature *376
Switch, cam, design changes *372
Synthetic resin replaces rubber *512
Tank, welded, enameled inside and out *10
Terminal strips *376
Tractor-mounted unit controls earth movers *312
Trip mechanism *376
Truck bodies of wood for Army *580
Valve plate assembly *318
Valve system, step *378
Water circulator replaces rubber with barrel spring *437
Wire throwing machine *512

Duplicating machine substitutes other materials for present materials *216

E

EDITORIALS:

The best is none too good 367
Designing for materials conservation. 181
Equal performance spells inferiority .. 427
Every design engineer can help 61
Facts combat prejudice 307
Fighting superiority is all that counts 487
"In the public interest . . ?" 547
Planning for the post-war period 615
To hasten the day of victory 1
Vision and enterprise 121
War's impact on design 247
Wings of wax are easily melted 679

ELECTRIC MOTORS, CONTROLS AND DEVICES:

Contacts for cord sets. E. O. Morton. *454
Multi-field pilot generator gives all-automatic motor regulation. C. W. Drake *521
Relays classified by types to simplify their selection. R. B. Immel, pt. 1, *591; pt. 2 ..... *647
Selenium rectifiers. C. A. Clarke, pt. 1, *135; pt. 2 ..... *266
Synchronous motor designed for starting torque and slow speed. Paul MacGahan *502
Time delay relays and their characteristics. R. B. Immel *86
Timing devices *26

Electroplating zinc on steel from waste materials 358

EXTRUSION:

Extruded aluminum and formed sheet steel sections compared *187
Extruded plastics for trim on sink *224
Extruded vinylidene plastics 285

F

Fastenings:
Riveted fastenings. E. C. Posner *446
Felt for industrial uses *159

FINISHES:

Brightness ratings. A. M. Suggs *253

Color for efficiency. Denning & Brainerd *19
Lead coatings 41
Methods to avoid corrosion *192
Salvage specifications *78
Silver coated steel 107
Synthetic resin varnish for coil insulation. Frost & Moses *144
Zinc coated steel sheets *564
Fits and tolerances. Dr. Ernesto Geiger .. *278
Flag rules *399

FORGINGS:

Design of forgings for speedier production. O. A. Wheelon, pt. 1, *524; pt. 2 ..... *560
Estimating forging costs. O. A. Wheelon *641
Forging design data—areas of forging sections. O. A. Wheelon (Ref. Bk. Sheets) *612

G

Gages—electric strain gages for measuring loads on machine parts. Frank Mittelberger *337
Gages in steel cases instead of aluminum. *230
tics *226
Gear tooth profiles. C. G. Pfeffer *328
Gears—efficiency of worm gears. A. C. Rasmussen (Ref. Bk. Sheets) *179
Glass in parts design *28
Glass, plate 161
Governors, acceleration-sensitive *150

H

Hammers, portable electric *452
Heating, electric—induction heating for hardening, annealing, brazing and forging. H. B. Osborn, Jr. *261
Holes:
Depth of tapped blind holes. A. H. Korn *465

HYDRAULIC DRIVES, UNITS, CONTROLS AND DEVICES:

Aircraft hydraulic control and power systems, pt. 1, *656; pt. 2 ..... *731
Hydraulic cylinders. Thompson & Campbell, pt. 1, *122; pt. 2 ..... *274
Simple method for calculating hydraulic coupling performance. R. E. Bruckner *698

I–J

Ibrigizing makes pump shaft corrosion resistant *193
Insulation—synthetic resin varnish for coil insulation. Frost & Moses *144
Thermal insulating materials for industrial equipment. S. V. Caginor .. *494
Iron, electric, materials changed *212
Iron, malleable cast *37

Joints, universal—how to determine loads by vectorial analysis. Hagenbook & Holstein *334

L–M

Lubrication—automatic oilers fit all needs. *142

Magnesium, welding of 604
Magnesium—redesigns to save aluminum and magnesium *190

MATERIALS:

Conservation of material in design of ordnance equipment. Lt. Col. J. H. Frye *428
Design and redesign of ordnance material. J. B. Nealey *568
Designing to reduce scrap *236
Factors that influence design when using different materials *530
Improved ceramics 349
Materials substitutes in home equipment *204
Materials changes in equipment and parts *220
Strategic materials table aids substitute selection *51

MATERIALS (Metals):

Alternates for light metals *186
Alternates on duplicators *216
Aluminum bronze. Wilkins & Bunn .. *472
Cadmium applications 105
Carbon-molybdenum steels 100
Cartridge brass. Wilkins & Bunn *42
Chromium and alloy steels 157
Cobalt alloy magnet steels 399
Common high brass. Wilkins & Bunn. *166
Cupro-nickels. Wilkins & Bunn *350
Deep drawing brasses. Wilkins & Bunn *102
Falk substitution record *246
Lead coatings 41
Leaded brasses. Wilkins & Bunn *407
Malleable cast iron *37
Malleablized steel 471
Material change saves copper, tin, zinc *197
Material conservation through Lindsay structure *240
National emergency steel specifications 182
Outboard motor redesigned to eliminate aluminum *194
Pearlitic manganese steels 343
Powder metallurgy saves metal and machines *237
Properties of Muntz metal. Wilkins & Bunn *290
Redesigns to save aluminum and magnesium *190
Redesigns by General Motors *214
Redesigns of simple steels *184
Register now made of steel and plas-
Silver brazing alloys and solders. Herbert Chase 283
Silver coated steel 107
Specification numbers for copper alloys. Wilkins & Bunn (Ref. Bk. Sheets), pt. 1, 423; pt. 2 483
Spring steels. H. Carlson, pt. 1, *2; pt. 2, *89; pt. 3 ..... *139
Spring steels. H. Carlson *405
Stainless clad steel 35
Steel sheets with zinc coating that withstands severe forming *564
Swedish and U. S. spring steels data. Harold Carlson *602
Tinless solders 403
Vanadium alloys 345
Welded steel lighter than aluminum castings *188

MATERIALS (Non-metallic):

Carbon and graphite 469
Compressed impregnated plywood 467
Cork for insulation 165
Cork substitutes 112
Felt for industrial uses *159
Glass in parts design *28
Hycar synthetic rubber 347
Improved ceramics 349
Mica and its conservation 97
Moisture impervious porcelain has new design possibilities. R. L. Whitney. *722
Neoprene rubber 287
Perbunan rubber 163
Plate glass 161
Thermal insulating materials for industrial equipment. S. V. Saginor .. *494
Wood shortage 581

MATERIALS (Plastics):

Aircraft plastics *398
Alternates for light metals *186
Choice of plastic materials as affected by fabrication. H. C. Hillman *584
Compression vs. injection molding. D. A. Dearle 331
Designing molded plastic parts. H. C. Hillman *498
Industrial plastic parts. T. N. Willcox *269
Laminated plastics 39
New plastic molding process *51
Operation chart for plastics in Army and Navy items. A. Sprung (Ref. Bk. Sheets) *745
Plastics in defense. D. W. Hoppock .. 47
Properties of thermosetting materials. H. C. Hillman (Ref. Bk. Sheets) ... 545
Redesigns by General Motors *214
Register now made of steel and plastics *226
Significant replacements by plastics .. *224
Strength of plastics. H. R. Moyer (charts & tables) 379
Urea plastics. M. H. Bigelow *93
Vinylidene plastics 285

Measurement of angles in space. H. H. Stevens, Jr. *443

MECHANICAL TRANSMISSIONS, UNITS AND PARTS:

Sleeve bearings. Bruno Sachs, pt. 1, *248; pt. 2, *322; pt. 3, *384; pt. 4 .. *462
Transmission linkages for multiplying short motions *726
Universal joints—how to determine loads by vectorial analysis. Hagenbook & Holstein *334

MECHANISMS AND MACHINE ELEMENTS:

Automatic oilers fit all needs *142
Electrical timing devices *26
Electrically-driven hammer mechanisms *452
Fits and tolerances. Dr. Ernesto Geiger *278
Power thrust linkages and their applications *326
Relays classified by types to simplify their selection. R. B. Immel, pt. 1, *591; pt. 2 ..... *647
Time delay relays and their characteristics. R. B. Immel *86
Mica and its conservation 97
Models and analogues for solving design problems. E. N. Kemler *660
Models used for predicting performance. H. O. Fuchs *556

N

NEW MATERIALS AND PARTS:

Adhesive resin, Resinous Products & Chemical 674
Ancor nuts with special bases, Boots Aircraft Nut *673
Angle drive, Payne Dean & Co..... *361
Angle irons, Tinnerman Products..... *609
Babbitt substitute, Magnolia Metal... 418
Bearings, non-magnetic, Miniature Precision, 481; self-lubricating iron, Keystone Carbon *176
Belt, V-, Goodyear Tire & Rubber, *362; having steel wire imbedded, Goodyear Tire *610
Black for copper, Enthone Co..... 361
Blower, L-R Mfg. Co..... *607
Blueprint dryer, Warren Electric Appliance *542
Blueprint files of wood, Hamilton Mfg. *481
Bracket for micro switch, Micro Switch *56
Brightening powder, Hanson Van Winkle-Munning 675
Cable terminal connections, Burndy Engineering *361
Caps for tubing, Tubing Seal-Cap.... *300
Cellulose tube seals, du Pont de Nemours *674
Ceramic body, machinable, H. L. Crowley 303
Ceramic plastic, Westinghouse Electric & Mfg..... *176
Clamps for aircraft wire installation, Tinnerman Products, *362; for conduits, Tinnerman Products, *302; toggle type, Detroit Stamping..... *420
Coatings, protective, David C. Brown, 479; Protective Coatings..... 361
Connector, network, Burndy Engineering, *177; connector, T-Burndy Engnieering *57
Contactor, dynamotor, General Electric *301
Contacts, laminated, Gibson Electric.. *609
Control, electronic motor, General Electric, *55; resistance welder, Square D, *421; *117; time schedule, Taylor Instrument *480
Copying machine, Paragon-Revolute Corp. *363
Cotton belting, Southern Friction Materials 674
Counter, electric, Production Instrument *362
Coupling, expansion, Mueller Specialty, *419; uses spherical gears, Barcus Engineering, *609; vibration-resistant, Raynould Coupling..... *421
Covering, protective, washable, Bergonize Co. 57
Covers for bearings, R-S Products.... 418
Cowling fasteners, United Car Fastener *608
Cutout, oil-fuse, General Electric..... *675
Cutting machine, Edi Trimming..... *57
Dark room printer, C. F. Pease..... *420
Drum controller, Cutler-Hammer..... *56
Dual scanner, United Cinephone..... *610
Duct, plug-in type, Square D..... *360
Dust collector, Aget-Detroit Mfg..... 117
Dynamic balancing unit, Westinghouse Electric & Mfg..... *174
Dynamotors, General Electric..... *417
Electrical testing panels, Standard Electric Time *543
Electrode, manganese steel, American Brake Shoe & Foundry..... *363
Fastener for metal sheets, United-Carr Fastener, *301; shakeproof cowl, Shakeproof *480
Ferrule resistor, Ohmite Mfg..... *543
Filter for lubricating systems, S. G. Frantz *303
Finish, metal, Maas & Waldstein..... 360
Fixture stude for bar hangers, General Electric *175
Gage measures wear, American Instrument, *607; Certified Gauge & Instrument *541
Generator, low frequency, Allen B. Dumont Laboratories, *420; revolving field, Century Electric..... *302
Glass sleeving, varnished, Wm. Brand & Co. *55
Guide blocks use plastic fittings, Tinnerman Products *675
Hose, electrically conductive rubber, Goodrich 303
Hydraulic power unit, Logansport Machine *541
Infra-red heat lamp, Wabash Appliance *116; *672
Insulation, electrical, Continental Diamond Fibre, *363; laminated, Formica Insulation 360
Insulation tubing, Irvington Varnish & Insulator *352
Iron, air furnace, Terre Haute Malleable 542
Labels to stick on metals, Ever Ready Label 673
Lacquer, clear stripping, Ault & Wiborg, 479; for black plate, Albert P. Hill Co..... 418
Light scanner, United Cinephone..... *301
Lubricating system, Lincoln Engineering *174
Lubricator, constant level, Oil Rite... *481
Meter, reflection, Photovolt Corp., *608; watthour and thermal demand, Westinghouse *54
Microtherm, remote bulb, Barber-Colman *674
Microvalve, Barber-Colman *481
Mixer with V-belt drive, Mixing Equipment *117
Moisture tester for wood, Industrial Instruments *478
Motor control centers, Westinghouse Electric & Mfg..... *300
Motor, aircraft, Signal Electric, *115, *478; explosion proof, *481; fan, General Electric, *301; proportioning control, Barber-Colman, *418; protected, Allis-Chalmers, *115; streamlined, Ohio Electric, *116; totally enclosed, Eastern Etching, 414; Crocker-Wheeler, *362; Torg Electric, *593; with special housings, Frazio Electric..... *479
Motor units for aircraft, Dumore Co.. *302
Nut, acorn lock, Laminated Shim, *480; Palnut Co., *481; speed with ring, Tinnerman, *55; twin type, Tinnerman, *417; wing style, Boots Aircraft Nut *542
Oil seal, American Brake Shoe & Foundry *115
Packing of synthetic rubber, Monarch Rubber 116
Paints for blackout or camouflage paints, Vita-Var, 175; for civilian applications, American-Marrieta ... 115
Panel and signal lamp, American Radio Hardware *672
Paper, anti-corrosive, Riegel Paper... 361
Paper fabric replaces priority materials *672
Pencil, mechanical drafting, Tec Pencil *420
Phenolic molding compound, Durez Plastics & Chemicals..... 301
Photocell, photronic dry-disk, Weston Electrical Instrument *177
Pipe joints, Tri-Clover Machine..... *176
Pipe repair band, Dresser Mfg..... *542
Plastic conduit casings, Searle Aero Industries *673
Plastic, general purpose, Durez Plastics, 543; high impact, Durez Plastics, 478; impact resistance, Bakelite, 304; reinforced sheet, Monsanto. 480
Pocket chart lists U. S. standard sizes, Elemoto Sales..... *675
Potentiometer element, Clarostat Mfg.. *610
Powdered iron compounds, Bound Brool Oilless Bearing..... 673
Power rectifier, Standard Transformer. *673
Primer, metal lead, Midland Paint & Varnish 420
Printing paper, dry developing, Frederick Post 304
Pulley lubricator, loose, Oil-Rite Corp. *542
Pulleys, conveyor, American Pulley.. *542
Pump, coolant, Eastern Engineering, *56; coolant, Gilbert & Barker Mfg., *541; hot-liquid, Eastern Engineering, *362; rotary air, Gast Mfg., *55; self-priming, Jabsco Pump, *675; vane-type, Hydra-Motive, *608; variable delivery, Watson-Stillman, *54; vertically mounted rotary..... *360
Push-pull button station for motor controls, Arrow-Hart & Hegeman Electric *540
Pyrometer, radiation, Bristol Co..... *417
Reclaimed rubber sponges, B. F. Goodrich *419
Rectifiers, Weltronic Corp..... *54
Relay, aircraft, General Electric, *303, *361, *419; Automatic Electric, *175; Guardian Electric, *302; Mercury, Durakool, *419; sensitive D-C, General Electric *418
Relay-contactor, magnetic, General Electric *360
Relay control locks, Allied Control... *672
Resistor, sectional, Westinghouse Meter Div. *417
Rheostat, Clarostat Mfg., *609; shatterproof, International Resistance.. *174
Rheostat cages, Ohmite Mfg..... *176
Rivet, hollow, Canadian Car & F'd'y... *177
Rubber, hard cellular, B. F. Goodrich, *420; synthetic hard, B. F. Goodrich *421
Saran pipe, Dow Chemical..... *607
Seal, safety and inspection, Stoffel Seals *175
Sheaves, wide-range, Allis-Chalmers, *540; wood, for V-belts, Dodge Mfg. *419
Slot insulation, Irvington Varnish & Insulator *543
Socket, water tight, Wood Electric... 541
Solder, high strength, L. S. Johnson Co. 303
Soldering device, Jiggers, Inc..... *55
Solenoid, laminated, D. W. Davis & Co. *57
Speed unit, variable, Worthington Pump & Mchy..... *673
Starter, Champion Aviation Products, *540; magnetic reversing, General Electric *421
Steel, water-hardening tool, Jessop Steel *699
Switch actuator, Micro Switch..... *418
Switch, aircraft, Mu-Switch Corp., *300; foot treadle, Simonds Machine, *540; limit, General Electric, *478; mercury, Durakool, Inc., *116; midget, Acro Electric, *479; miniature, General Electric, *417; moisture resistant, Mu-Switch, *418; multicircuit, for aircraft, General Electric, *543; overtravel type, Acro Electric, *115; positive locking, National Acme, *672; prevision limit, Square D, *419; rotating type limit, General Electric, *303; safety, Bulldog Electric *57
Swivels, Trabon Engineering..... *608
Testing device uses tuning fork principle, Kurman Electric..... *610
Thermostat, George Ulanet Co..... *116
Timer, electrical, Sangamo Electric, 177; explosion proof, R. W. Cramer, *541; Industrial Timer, *540; resistance welding, Westinghouse Electric, *302; vernier set, Automatic Temperature *607
Tracing board, portable, Hamilton Mfg. *363
Tracing cloth, pencil, Frederick Post Co. 417
Transformers, adjustable voltage auto, General Electric *361
Transmission, machine tool, Western Mfg., *56; variable, with chain reducer, Reeves Pulley..... *478
Tubing, cellulose acetate, Celluloid, *117; extruded insulation, Brand & Co., *176; insulation, Irvington Varnish, 301; welded stainless, Globe Steel 116
Valve, balanced hydraulic, Galland-Henning Mfg., *303; Central Controls, *174; high-pressure, Atkins & Co., *56; hydraulic selector, Adel Precision, *177; Bendix Aviation, *608; noiseless relief, Adel Precision, *479; restrictor, Bendix Aviation...*610
Valve control unit, remote, Foxboro Co. *300
Varnish, insulation, Sterling Varnish. 420
Vernier head, remote control, Arens Controls *300
Voltmeter, vacuum tube, Hewlett-Packard *360
Washers, lock, Dayton-Rogers Mfg... *117
Welder, a.c. heavy-metal, Allis-Chalmers *674
Whiteprint machine, Ozalid Products. *54
Wire fastening device, Bendix Aviation *175
Wrapping material, Dearborn Chemical 543

P

PATENTS:

Bill gives President war-time power to confiscate patents..... 536
Case histories in patent law. H. A. Toulmin, Jr. 111, 170, 296, 413
Patent procedure, Miles Henninger, pt. 1, *16; pt. 2, *82; pt. 3, *148; pt. 4 281
Senate Committee undertakes patent reform by confiscation, pt. 1, *548; pt. 2 ..... *644
Photo-template processes that lessen drafting work *707
Photo-tracing. L. C. Jones..... *23
Photography—computing distances for shop photos. A. C. Rasmussen.....*493
New uses for photography in the engineering department *598
Photostat-tracings save drafting room time. L. C. Jones..... *653
Piping—wrench clearances required for bolting-up pipe flanges. A. H. Korn. *154
Pistons—from aluminum to iron pistons.. *186
Plate shear cutting loads. J. P. Doolan (Ref. Bk. Sheets)..... 677
Plywood, compressed impregnated..... 467
Post-war prospects. G. F. Nordenholt....*308
Power thrust linkages and their applications *326
Preferred, numbers, prefernograph simplify product standardization. John Gaillard *665
Printing press, aluminum, now of welded steel *188
Propeller fan of aluminum, changed to steel *191
Pumps — design of gear pumps. J. C. Monahan *411

R

Recorder in steel case instead of aluminum *231
Recording instrument, aluminum, now welded sheet steel..... *196

Rectifiers, selenium. C. A. Clarke, pt. 1, *135; pt. 2.....*266
Refrigerator materials changed.....*212
Relays classified by types to simplify their selection. R. B. Immel, pt. 1, *591; pt. 2 .....*647
Relays, time delay. R. B. Immel.....*86
Riveted fastenings. E. C. Posner.....*446

S

Salvage specifications *78

SCALES:

Bronze changed to cast iron.....*198
Changed from aluminum to steel....*200
Stainless steel, now of coated cast iron *201
Toledo Scale changes materials in parts *220
Sewing machine—wood substituted for metal *210
Shafts, rectangular, theory of torsion of. M. F. Spotts.....*318
Sheaves for wire rope. F. L. Spangler.... 533
Shipbuilding—Liberty ships built to deliver cargoes for war.....*488
Silver brazing alloys and solders. Herbert Chase 283
Slide rule, special. R. S. Diserens.....*340
Solders, tinless 403
Speedometers, Stewart-Warner, redesigned *228
Springback in flanging. Chapman, Hazlett & Schroeder.....*382

SPRINGS:

Conical springs. August Bodenschatz.*109
Helical tension spring tables. (Ref. Bk. Sheets.) Paul Klamp. pt. 3.... 59
Procedure blanks and charts simplify spring design. Carl Thumin.....*662
Spring steels. H. Carlson, pt. 1, *2; pt. 2, *89; pt. 3.....*139
Spring steels. H. Carlson.....*405
Testing small springs. J. F. Cavanagh *520
Standardization simplified by preferred numbers, prefernograph. John Gaillard *665
Stresses—deflection of beams under simultaneous axial and transverse loads. A. G. Strandhagen.....*396
Rectangular shafts—torsional stresses and angular deformations. M. F. Spotts *319

T

Thrustors and their applications.....*326
Timing devices *26
Toaster, electric, materials changed.....*212
Toggle design. H. A. Illing..... *68
Tolerances and allowances (Ref. Bk. Sheets) 305
Tolerances and fits. Dr. Ernesto Geiger..*278
Tolerances—dimensional tolerances and quality control. J. W. White.....*634
Tractor, Ford, parts now of cast iron....*190

V

Vacuum cleaner—steel, plastics replace aluminum *208
Vanadium alloys 345
Vibration control. Leon Wallerstein, Jr.. *62
Vibrations—calculation of vibrations in multi-mass systems. C. R. Freberg.*588
Vibrations, impact. L. M. Dekanski, pt. 1, *458; pt. 2.....*518

W

WAR:

Washing machine—materials substituted.*204

WELDING:

Aircraft welding. R. R. Wiese (Ref. Bk. Sheets) *119
Comparison of welded joints.....*230
Designs of deep-drawn shapes made by simple dies and welding. E. H. Hautz *728
Detail design for joining by flash welding. L. W. Combs.....*552
Electrode size versus weight and cost of joint 230
Magnesium use broadened by new welding process 604
Reclaiming defective parts..... *78
Spot welding stiffener panels.....*671
Welded construction. E. W. P. Smith.*388
Welded strap ends for brake and clutch bands. Gustaf Johansson...*262
Welded structures: causes of deformation and their correction. Gustaf Johansson *390
Wrench clearances required for bolting-up pipe flanges. A. H. Korn.....*154

INDEX TO AUTHORS

BERKLEY, L. H. How to determine WR^2 by running a simple test....*704
Bigelow, M. H. Urea plastics..... *93
Bodenschatz, August. Conical springs....*109
Borgquist, John W. Surface roughness controlled by aircraft standard...*658
Brainerd, Arthur A. & Matt Denning. Color for efficiency..... *19
Bruckner, Robert E. Simple method for calculating hydraulic coupling performance *698
Bunn, E. S. & R. A. Wilkins. Aluminum bronze *472
Cartridge brass *42
Common high brass.....*166
Cupro-nickels *350
Deep drawing brasses.....*102
Leaded brasses *407
Properties of Muntz metal.....*290
Specification numbers for copper alloys, pt. 1, 423; pt. 2..... 483

CAMPBELL, Rodney B. & J. E. Thompson. Hydraulic cylinders, pt. 1, *122; pt. 2.....*274
Carlson, Harold. Data on Swedish, U. S. spring steels 602
Spring steels, pt. 1 *2; pt. 2, *89; pt. 3.*139
Spring steels *405
Cavanagh, John F. Testing small springs.*520
